

SONUPRAKASH T M

QA AUTOMATION ENGINEER | SDET | PYTHON | PLAYWRIGHT | API TESTING | CI/CD

+919605888305 | sonuprakash78368@gmail.com | Kerala, India | [LinkedIn](#)

PROFESSIONAL SUMMARY

QA Automation / System Test Engineer with 4 years of experience in enterprise software testing and automation, specializing in Python/PyTest, Linux-based system testing, CI/CD, and NetApp ONTAP storage environments. Experienced in functional and regression automation, system-level validation, defect analysis, log analysis, and storage technologies including NAS, RAID, replication, snapshots, and failover. Strong exposure to REST API testing and Jenkins-based continuous testing, with additional hands-on experience exploring GenAI, LLM integration, RAG, and AI-driven automation.

CORE TECHNICAL SKILLS

Automation & Testing: Python, PyTest, Playwright, TypeScript, PowerShell, Page Object Model (POM), End-to-End Testing, Functional Testing, Regression Testing, Test Automation, Cross-Browser Testing, Test Fixtures, Test Data Management, Defect Triage, Root Cause Analysis

API & Integration: REST API Testing, API Automation, Postman, HTTP Methods, JSON Validation, Request/Response Validation, API Assertions, API-driven UI Testing

CI/CD & Version Control: Jenkins, Git, GitHub, GitHub Actions, CI/CD, Continuous Integration, Automated Test Execution

Test Management Tools: JIRA, qTest, Perforce, Confluence, PuTTY

Databases: PostgreSQL, MySQL, SQL

Enterprise & Storage (NetApp ONTAP): SnapMirror, SnapMirror Failover, Snapshots, RAID, Failover, Deduplication, Cloning, Replication, CIT, FBOT

Observability & Security: Splunk, ELK Stack, Grafana, Tenable Nessus, Codenomicon, Netsparker, Log Analysis, Security Testing

Web Development: Django, Django REST Framework, JavaScript, HTML, CSS

AI & LLM (Personal Projects): RAG, LLM Integration, Prompt Engineering, CrewAI, LangChain, Multi-Agent Systems, OpenAI API, ChromaDB, Streamlit

PROFESSIONAL EXPERIENCE

Senior Software Engineer (QA Automation) — Vevolve Software Pvt Ltd Jul 2023 – Present

- Developed and maintained Python-based test automation for enterprise CIT and FBOT testing, driving consistent, repeatable release validation.
- Automated functional and regression testing across NetApp ONTAP releases, covering core storage workflows including snapshots, SnapMirror, and failover scenarios.
- Reduced CIT/FBOT automation failures by approximately 40% through framework stabilization, defect analysis, debugging, and targeted test improvements.
- Investigated automation and software defects through root cause analysis, collaborating with development and QA teams on defect triage and release readiness.
- Supported REST API migration validation as legacy ZAPI/ONTAPI workflows transitioned to REST API-based interfaces, performing compatibility and regression testing.
- Performed ONTAP upgrade/revert validation and storage-related test scenarios, along with security testing using Tenable Nessus, Codenomicon, and Netsparker.
- Executed and monitored automated test runs through Jenkins CI/CD, and tracked defects and test cases using JIRA, qTest, Perforce, and Confluence.

Junior Software Engineer (QA Automation) — Vevolve Software Pvt Ltd Aug 2022 – Jun 2023

- Built and maintained Python automation scripts for functional and regression testing of enterprise storage software.
- Improved project efficiency by approximately 25% through automation improvements and streamlined testing activities.
- Investigated software defects and supported REST API migration efforts, validating functionality against legacy ZAPI/ONTAPI behavior.
- Executed automated test suites within a Jenkins CI/CD pipeline and tracked issues through JIRA and qTest.
- Collaborated cross-functionally with development and QA teams in an Agile environment to support sprint testing goals.

Python Fullstack Developer Intern — CamerinfoLks Pvt Ltd Mar 2022 – Aug 2022

- Developed web applications using Python and Django, and implemented REST APIs using Django REST Framework.
- Performed unit, functional, and API testing while validating application behavior and backend responses.
- Worked with SQL databases and frontend technologies including HTML, CSS, and JavaScript.

PERSONAL QA AUTOMATION PROJECT

TestForge Playwright — End-to-End QA Automation Framework

Technology: Playwright, TypeScript, PowerShell, Page Object Model, REST API, GitHub Actions, CI/CD.

GitHub: sonuprakash-cell/testforge-playwright

- Built a TypeScript-based Playwright end-to-end automation framework using Page Object Model architecture for maintainability and scalability.
- Implemented reusable BasePage and page objects for login, inventory, cart, checkout, and order completion workflows.
- Implemented REST API automation covering GET, POST, and DELETE operations with HTTP status and JSON/property-level validation.
- Implemented API-driven UI integration by retrieving data through an API and consuming it within a browser-based checkout workflow.
- Configured Chromium, Firefox, and WebKit execution with Playwright HTML reporting, screenshots, videos, and trace-based failure diagnostics.
- Integrated automated test execution with GitHub Actions CI/CD, including dependency setup, browser installation, test execution, and artifact upload.

PERSONAL AI PROJECTS

VentureMind AI — AI-Powered Startup Validation Platform

Technology: Python, RAG, LLM Integration, CrewAI, Multi-Agent Systems, LangChain, ChromaDB, Streamlit.

GitHub: sonuprakash-cell/venturemind-ai

- Built a RAG and multi-agent workflow for startup validation and business analysis.
- Designed specialized agents for market analysis, competitor analysis, and go-to-market evaluation.
- Integrated structured knowledge sources with vector retrieval and LLM-based reasoning to generate startup validation insights.

LinkedIn Profile Optimizer — AI-Powered Profile Optimization Workflow

Technology: Python, LLM, Prompt Engineering, Multi-Agent Systems, OpenAI API, Streamlit.

GitHub: sonuprakash-cell/linkedin-profile-optimizer

- Built a multi-agent workflow for LinkedIn profile analysis and optimization.
- Implemented specialized agents for profile auditing, headline rewriting, and experience optimization with reusable parsing and validation utilities.

EDUCATION

Bachelor of Computer Applications (BCA) - University of Calicut [2018 – 2021]
